EDUCATION

Zaporizhzhia Electrotechnical Professional College

Junior Specialist In Software Engineering

Zaporizhzhia, Ukraine

Sep 2018 – Jul 2022

National University Zaporizhzhia Polytechnic

Bachelor In Computer Science

Zaporizhzhia, Ukraine

Sep 2022 – Jul 2025

Master In Software Engineering

Sep 2025 – Present

EXPERIENCE

Frontend Developer

Remote

Futurix Solutions

Sep 2025 – Jun 2026 (10 mos)

- **Designed and implemented a complex dashboard-based educational platform from scratch**, establishing role-based access control and distinct, tailored interfaces for students, instructors and administrators.
- **Developed an interactive AI-powered chat interface for students**, successfully deploying real-time message streaming, efficient conversation history management and optimistic UI updates to achieve an instantaneous user experience.
- **Optimized data delivery and UX for dashboard layouts** by implementing sophisticated client-side data filtering, sorting and pagination logic, ensuring fast rendering and seamless interaction with large datasets.
- **Built and deployed a Cloudflare Workers edge script** to efficiently capture, process and securely forward visitor metadata (IP, User Agent, referrer, etc.) to a private backend API.
- **Engineered scalable state management and data layer architecture** by integrating Zustand and optimizing server-state synchronization via TanStack Query, which minimized re-renders and drastically improved app performance.
- **Maintained high codebase quality** by actively leading team code reviews and driving agile processes, successfully enforcing unified camelCase naming conventions and clean code standards across new repositories.

Stack | *React, Nextjs, TypeScript, TanStack Query, Zustand, React Hook Form, TailwindCSS, shadcn/ui*

Fullstack Developer

Remote

JavaScript Ninjas

Mar 2025 – Aug 2025 (6 mos)

- **Architected a robust relational database schema** with multiple related entities using Prisma and PostgreSQL, ensuring data integrity and optimized query performance.
- **Designed and integrated a secure authentication and role-based access control system** utilizing JWT, establishing protected routes and tailored application areas for regular users and administrators.
- **Developed a high-performance REST API from the ground up**, featuring full CRUD operations, advanced server-side filtering, sorting, pagination and automated background tasks for periodic event processing.
- **Created a dynamic, real-time user interface** featuring complex interactive data tables and a real-time messaging layout powered by Socket.io with pagination and auto-updates.

Stack | *React, Redux, TypeScript, NestJS, PostgreSQL, Socket.io, TailwindCSS, shadcn/ui*

Fullstack Developer

Kyiv, Ukraine

Digital Solutions

Aug 2023 – Feb 2025 (1 yr 7 mos)

- **Successfully developed and shipped multiple feature modules** for a core web application under the guidance of a senior developer, meeting all project deadlines.
- **Transformed design layouts into pixel-perfect reality**, creating highly adaptive, responsive web pages directly from Figma design assets.
- **Modernized and maintained critical client-facing web modules** built on Vue (including the personal profile and order placement sections), significantly reducing runtime bugs through refactoring.
- **Streamlined frontend-backend communication** by implementing simple, clean REST endpoints on the backend and seamlessly connecting frontend components to APIs using Axios.

Stack | *Vue, TypeScript, NestJS, PostgreSQL, TailwindCSS*

Fullstack Developer

Remote

Freelance

Apr 2022 – May 2023 (1 yr 2 mos)

- **Delivered multiple lightweight Single Page Applications (SPAs)** tailored to client specifications, owning the entire lifecycle from development to deployment.
- **Implemented core user-facing features** on React and Vue, including functional product catalogs, dynamic filtering, data search and responsive user profile pages.
- **Established clean client-side routing structures** by configuring Vue Router with strict route guards to secure user access.
- **Built backend foundational layers** for client applications, setting up relational databases in PostgreSQL, managing data migrations and delivering reliable Nest.js CRUD endpoints.

Stack | *NestJS, PostgreSQL, React, Redux, TypeScript, Vue, Vuex, Tailwind*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frameworks: Vue.js, Next.js, Nest.js

Libraries: React.js, React Hook Form, Zod

State managers: Redux Toolkit, TanStack Query, Zustand

Styling: Scss, TailwindCSS, Material UI, shadcn/ui

Database: PostgreSQL, Prisma, TypeORM, Mongoose, GraphQL

Developer Tools: GitHub, BitBucket, Jira, Trello, Notion, Docker, VS Code, Visual Studio, IntelliJ, Antigravity
