EDUCATION

Zaporizhzhia Electrotechnical Professional College

Junior Specialist In Software Engineering

Zaporizhzhia, Ukraine

Sep 2018 – Jul 2022

National University Zaporizhzhia Polytechnic

Bachelor In Computer Science

Zaporizhzhia, Ukraine

Sep 2022 – Jul 2025

Master In Software Engineering

Sep 2025 – Present

EXPERIENCE

Freelance

Remote

Junior Fullstack Developer

Apr 2022 – Jul 2022

- Implemented simple REST endpoints on NestJS and Laravel
- Worked with database (PostgreSQL, MySQL): CRUD operations, migrations
- Developed basic pages on React: product list, user profile

Stack | *NestJS, PostgreSQL, React, Redux, TypeScript, Laravel*

Junior Frontend Developer

Oct 2022 - May 2023

- Developed small SPA projects for clients
- Added filtering and data search
- Worked with Vue Router: setting up routes and guards
- Created pages and components, integrated REST API

Stack | *Vue, Vuex, TypeScript, Tailwind*

Digital Solutions

Kyiv, Ukraine

Junior Fullstack Developer

Aug 2023 – Feb 2025

- Developed new modules for a web application under the leadership of the senior developer
- Created adaptive pages based on Figma layouts
- Supported and modified separate modules on Vue and Nuxt (personal account, order page)
- Connected components to the API via Axios
- Fixed bugs and refactored existing code
- Integrated frontend with backend API (NestJS and Laravel)
- Implemented simple REST endpoints and CRUD operations

Stack | *Vue, TypeScript, NestJS, Laravel, PostgreSQL, TailwindCSS*

JavaScript Ninjas

Remote

Middle Fullstack Developer

Mar 2025 – Aug 2025

- Designed a relational database with multiple related entities using Prisma and PostgreSQL
- Implemented a registration, login and authorization system via JWT with access control by roles (user, admin)
- Set up JWT authentication, session processing and route protection
- Developed a REST API with CRUD operations, filtering, sorting and pagination
- Implemented public and protected areas of the application, including the admin interface
- Set up periodic background tasks for event processing
- Built a UI with filters, sorting, dynamic tables and interaction with the REST API
- Developed a real-time messaging interface with auto-update and pagination

Stack | *React, Redux, TypeScript, NestJS, PostgreSQL, Socket.io, TailwindCSS, shadcn/ui*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP

Frameworks: Vue.js, Next.js, Nest.js, Laravel

Libraries: React.js

State managers: Redux Toolkit, Zustand

Styling: Scss, TailwindCSS, Material UI, shadcn/ui

Database: PostgreSQL, Prisma, TypeORM, Mongoose, GraphQL

Developer Tools: GitHub, BitBucket, Jira, Trello, Docker, VS Code, Visual Studio, IntelliJ
